

**Stock at Stake and Centre Info now responsible for SiRi research and advice in France.**  
**05/06/02**

The SiRi Group (Sustainable Investment Research International) today (5th June) announces that profiles of French stocks within the SiRi Global 500 and the MSCI World Index will be researched by existing SiRi members, CentreInfo (based in Switzerland) and **Stock at Stake** (based in Brussels). Together, Centre Info and Stock at Stake have over 25 French-speaking SRI research staff. The same organisations will provide full support to French asset managers and institutional investors by offering customised services based on SiRi profiles of global corporations. Previously, French research was provided by Arese, which has left the SiRi Group by mutual agreement. Source: [SiRi](#).
